

UTILITY APPLICATIONS

THE PICS MASTFLEX TRAILER

PORTABLE INTELLIGENCE COLLECTION SYSTEM

THE PiCS MASTFLEX TRAILER

Natural gas, petroleum, electrical, and other public utility facilities are some of the most expensive in the world. Transmission corridors and pipelines add another tremendous investment that must be protected.

Terrorism, vandalism, and a host of other security threats in today's global disorder force organizations like yours across the globe to deplete their limited budget on security. Refineries, storage facilities, power plants, substations, and transmission hubs are not only expensive, they are some of the most vulnerable. You've built fences, installed security cameras, and employed a security force, but are they enough?

And furthermore, federal mandates now require power utilities to protect their transmission corridors, regardless of any extra expenses. Can you afford to put security personnel along hundreds of miles of transmission corridors and pipeline?

How do you:

- **MONITOR** critical locations?
- **PLACE** sufficient security while keeping your personnel budget from spiraling out of control?
- **COVER** remote corners of your facilities, pipelines, and transmission corridors, over perhaps hundreds of miles, 24/7?
- **Double or triple** your security force for less expenditure than the cost of a single employee?
- **REDUCE** the risks of employee injury or death and damage to your assets while getting the security you need for less cost?
- **SEND** the proper response to a remote location quickly and efficiently without exploding your security expenditures?

The PiCS MastFlex Trailer is your answer to all those questions.

PiCS raises the bar on RELIABILITY The PiCS MastFlex Trailer was designed to be easy to place, easy to use, and operate practically maintenance free, yet rugged enough to withstand harsh conditions and rough terrain.

- **MOVE** units anywhere, anytime.
- **WATCH** real-time video from any of your PiCS units from anywhere in the world over a broadband internet connection. Video is sent wirelessly to a secure location where it can be recorded as tamper-proof "prosecutable" video.
- **CONTROL** your PiCS units remotely. You can have complete pan, zoom, tilt control from your office or living room.
- **DISPATCH** a human response to a remote event.
- **RECOGNIZE** significant events at critical sites, such as intruder detection, door access, movement within a perimeter, etc.
- **DETERMINE** instantly where and whether a human response is needed.
- **DEPLOY** nearly anywhere in 15-30 minutes, with fully powered operation. No hand-cranking, lifting, or other physical strain.
- **ENSURE** stability in all sorts of terrain and weather conditions with the adjustable outriggers.

PiCS establishes higher benchmarks in FLEXIBILITY The PiCS MastFlex Trailer offers the widest range of surveillance and communications options on the market today.

- **CAMERA SYSTEMS** From high quality TV video to high-definition DVD quality and beyond, customizable cameras let you read license plates and identify individuals at tremendous distances!
- **NIGHT VISION** See crystal-clear video in the dead of night.
- **WIRELESS PAGING** Alert your security force or law enforcement.
- **WARNING SIREN** Ward off intruders or guide security personnel to critical location.
- **SATELLITE OR CELLULAR PHONE** Make a phone call from the deployed unit.
- **CAMOUFLAGE PAINT** Conceal your security system.
- **SECURITY LIGHTING** Send intruders running with high-power illumination or provide light incoming security.
- **UPGRADEABLE WIRELESS COMMUNICATION** Maximize your coverage distance.
- **FLOTATION TIRES** Take units anywhere, even the most inhospitable terrain.
- **GPS LOCATORS** Find out exactly where the problem is.
- **BATTERY CAPACITY AND CHARGING** Wide range of options makes your PiCS units completely self-sustaining.

PiCS sets new standards in SECURITY The PiCS MastFlex Trailer is designed to protect all sensitive equipment from harsh environmental conditions as well as living intruders.

- **ENCRYPTED TRANSMISSION** All transmissions are encrypted to ensure your security and the integrity of your video.
- **TAMPER RESISTANT ENCLOSURE** Locked steel enclosure prevents all unauthorized access.
- **PROTECTED CABLING** Wiring and cabling are contained within steel mast and enclosure.
- **ADJUSTABLE OUTRIGGERS** The unit is stable not only in rough terrain, but can safely withstand up to 100 mph winds, so in hurricane or thunderstorm season, you have one less thing to worry about.

RELIABLE. FLEXIBLE. MOBILE. SECURE.

Speak to one of our representatives today to see how the PiCS MastFlex Trailer can increase your security and reduce your costs.

Magnify Your Manpower.
